Course	Legal English
	Bachelor Economic Law
Type of Course	Lecture & Tutorial
Credits	6 ECTS
Description	This course provides a general introduction to the English legal system, legal language and terminology. The goal is to introduce students to basic legal terminology in different key fields of law and to familiarize them with English legal texts. In addition, the course will focus on different aspects of contract and company law. For this purpose, it provides a variety of carefully structured exercises, partly taken from current 'International Legal English Certificate' test files by University of Cambridge where students are encouraged to apply the language actively through case studies and compact discs to improve listening skills. Moreover, 'Law and Language' focuses on legal correspondence. Last but not least, current CNN TV news clips will be screened on a regular base in order to provide ample opportunity for discussion.
